EDUCATION

City College of New York – Grove School of Engineering Manhattan, New York
Bachelor of Science in Computer Science May 2020

Columbia University Manhattan, New York
Full Stack Web Development Program Summer 2019

Relevant Coursework

Programming (C++, Python) • Algorithms • Software Engineering • Database Systems • Web & UX Design • Computer Aided Analysis • Digital Logic • Assembly • Web Security • Operating Systems

SKILLS

Languages: C++, Python, JavaScript, VHDL, SQL, HTML & CSS, MATLAB

Frameworks: Express, Bootstrap, React

Databases: MySQL, MongoDB, Firebase

Software: Git, Visual Studio, Microsoft Office Suite, Adobe Photoshop & Illustrator, HitFilm Video Editor

PROJECTS

SpeakUp! (*HTML & CSS, Bootstrap, JavaScript, MySQL, Google Map & Geocaching API*)

A Node based app that allows users to view and report crimes. Performs queries to a local MySQL database using Sequelize. Utilizes Google Maps and Geocaching via APIs.

Computer Organization & Architecture (VHDL, MIPS, C++, Assembly, VS Code Debugger)

A collection of labs and projects aimed at understanding the low-level design of computer architecture systems. Includes creating a mini-ALU, simulating RAM and comparing program compilation in various environments such as Windows, Linux and MARS.

WORK EXPERIENCE

NBC Sports Group Stamford, Connecticut
Post-Production & Studio Engineering Intern September 2017 – August 2018

- Configured editing/recording equipment for live events (Super Bowl LII, 2018 Winter Olympics, etc.)
- Transferred event footage from onsite storage units to larger in-house network
- Utilized software for emergency equipment during live broadcasts via auditing cables, adapters, etc.
- Worked alongside producers and engineers in control rooms during nationally broadcasted programs

Musashi & Co. Ltd. Scarsdale, New York
Marketing & Sales Associate December 2015 – September 2017

- Designed new store logos, mascots, and signs aimed at both local and foreign based customers
- Implemented and maintained social media presence for business (Facebook, Instagram, Twitter)
- Redesigned store website to have a modern and user-friendly interface via WordPress
- Conducted point of sale transactions and cleaned and maintained customer eating areas
